

Comparisons of MET distribution for various Out-Of-Time PU samples

- ❑ PFME_{x,y} in Ecal and PFMet total

- ❑ Default means:

- for Calo: EB > 2 GeV, EE > 2 GeV, kOutOfTime applied
- for PF: EB > 2 GeV, No cut on EE, kOutOfTime applied

PFME_x (photons) Plots for 25 ns Early OOT sample

PFME_x ECAL

PFME_x ECAL

PFME_x ECAL

PFME_x ECAL

✧ When it is not mentioned
EB > 2 GeV
is applied for
both Calo
and PFlow

PFMEEx Plots for 25 ns Early OOT sample

MET_PFMEx
